Ricky

From Chairman: The next step for the bridge project is to follow the traditional processes for any transportation project to include finalizing engineering and going through the traditional right of way and easement acquisition procedures.

Hope this helps

Understood. But surely Chairman Lee can give me an answer the first question, about what the next step is for the bridge project.

Ricky

Hey! Glad I asked. These are all process questions and Jim Wilgus is the best person to answer them. I called to give him a heads up. He did not answer. I left him a voicemail that you would be reaching out.

From Chairman Lee:

The Multi Use Bridge is an essential public safety project that will be connecting Cobb's 2 major commercial and tourist centers and the vote today was another step in the right direction.

Sorry, I've been in a meeting myself. A few questions are below:

- With approval from the Authority, what is the next hurdle for the bridge project?
- What's the latest on the purchase of right of way for the bridge project?
 - Do you have a cost estimate yet?
 - An estimate on how much land is needed?
 - When does this need to be completed?
- When does the county plan to issue an RFP from construction companies to build the bridge?
- What's the latest on negotiations with Childress Klein on air rights for the bridge project?

Thanks.

Hey! Chairman is running late on the meeting he is in now which means his next meeting will also run late. Just in case, I can't get him out early, can you email me questions in case I have to send you answers in writing?

I'll do best I can to get him on the phone...

Kellie
